

WHAT'S NEW

Christmas Greetings From Our Home in California for a Season Filled With Hope & Peace!

As we begin to celebrate the season, let us not forget the importance of home and family. Bringing friends and loved ones together is the most important part of this

time of year. Let us remember these times with the simple acts of kindness for those who need the true meaning of Christmas & the season LOVE.

WHAT DO I SEE IN COLOR?

This past year I have seen many different uses of color. I have watched the fashion runways, attended opera and theater and I have not seen one real color trend.

As we go through our fabric sales each month it appears that the monotonous lead the pack. Shades of gray, taupe, off white and beige seem to be with us for awhile. I believe the consumer is playing it safe and will use color to punch up a room as an accent in a pillow or an accessory and this makes sense. (Sunbrella pattern: FRANK, below)
